Profile Summary

MCA student and B.Sc. Computer Science graduate with hands-on experience in AWS, Linux, Docker, Terraform, Jenkins, and CI/CD. Completed Cloud Application Developer training with practical experience in cloud infrastructure provisioning, containerized deployments, and automation. Seeking entry-level opportunities in Cloud Engineering, DevOps, Cloud Support, or Infrastructure roles.

Education

Master of Computer Applications (MCA) 2026 – Present
JSPM's Jayawantrao Sawant Institute of Management and Research (JIMS), Tathawade, Pune

Bachelor of Science in Computer Science 2023 – 2026
C. T. Bora College, Shirur CGPA: 9.30
HSC: 69.00% SSC: 92.60%

Technical Skills

Cloud: AWS, EC2, S3, IAM, VPC, EBS, RDS, DynamoDB, ALB, Auto Scaling, CloudWatch, Lambda, SNS, ECS, ECR, Fargate
DevOps: Docker, Docker Compose, Jenkins, Terraform, Ansible, CI/CD, Shell Scripting, Git, GitHub, Docker Hub, IaC
Networking: TCP/IP, IP Addressing, CIDR, Subnets, Route Tables, Internet Gateway, NAT Gateway, Security Groups, NACLs, DNS, HTTP/HTTPS, Reverse Proxy, Load Balancing
Linux & Systems: Linux, Ubuntu, Windows, Linux Administration, File Permissions, Processes, AWS CLI
Programming & Databases: C, Java, HTML, CSS, MySQL, SQL, Amazon RDS, Amazon DynamoDB
Core: OOP, DBMS, Operating Systems, Cloud Computing, Containerization, Version Control

Projects

One-Click DevOps Deployment Platform GitHub
Node.js, Express.js, React, Docker, AWS EC2, Linux, REST APIs

- Developed a web-based platform to automate application deployment from a public GitHub repository to AWS EC2.
- Automated repository cloning, Docker image creation, container deployment, and generation of an accessible application URL.
- Developed REST APIs and configured the Linux environment, application ports, and AWS Security Groups.

End-to-End CI/CD Pipeline Using Jenkins GitHub
Jenkins, Docker, GitHub, Docker Hub, React

- Developed a Jenkins-based CI/CD pipeline to automate the build and deployment of a containerized application.
- Integrated GitHub, Docker, and Docker Hub to automate application packaging and container deployment.

AWS Infrastructure Provisioning Using Terraform GitHub
AWS, Terraform, VPC, EC2, Security Groups, IAM

- Provisioned AWS infrastructure using Terraform, including VPC, networking components, security groups, and EC2 instances.
- Automated SSH key pair creation and infrastructure provisioning using Infrastructure as Code (IaC).

Training

Cloud Application Developer Trainee Completed
MIDC Skill Development Center

- Completed hands-on training in AWS Cloud, Linux Administration, Networking, Git/GitHub, Docker, Terraform, Jenkins, Ansible, and CI/CD.
- Practiced AWS infrastructure setup, containerized deployments, reverse proxy, load balancing, and automation.

Achievements & Certifications

- TCS iON Cognitive Assessment 2025: 78.15%.
- Qualified at the Zonal Level in the Avishkar Research Convention.
- Participated in Quackathon 2026 and developed CloudOps Mentor AI with team Byte-Builders.
- Completed AI Tools Workshop Certification.
